16. Detailed arrangements

Curtains and drop nets

Offered curtains and drop nets are made of polypropylene, which stretches with the lapse of time. During installation, a curtain or drop net have to be hanged about 20 cm over the floor in a sports hall, in order to naturally fall down to the floor level after few weeks use.

The stretching of curtain or drop net fabrics is happening naturally during any sports hall use and cannot be the base for a complaint. Each new made curtain and drop net in their upper part have additional stitches which enable a change in the height of a net.

The purpose of drop nets used in sports halls is to catch and slow down a kicked ball, so they do not

secure sports hall equipment. A drop net, in order to fulfil its role, has to be placed at least 1.00 m from its neighbouring element (a wall, a stand, a pillar, etc.).

Protective nets for windows

Please note ! A protective net for windows is made of polypropylene. Their purpose in sports halls is to catch and slow down a kicked ball, so they cannot 100% secure the sports hall windows. The nets, in order to fulfil their function have to be installed 30-50 cm from a hall window, depending on their surface. The stretching of a net is happening naturally during any sports hall use and cannot be the base for a complaint.

Bush mounting

Please note ! The bushes are mounted by preparing a hole in a surface and placing a correct bush in the foundation footings. Bush mounting does not include costs of removing debris created during the mounting. The debris can be levelled or transported to a place pointed out by the purchaser, not farther than 50 m from the place of the mounting (unless the offer remarks stipulate otherwise).

Dimensions

Sport Transfer is not responsible for the dimensions of custom-made elements, if the Customer reported them erroneously. It is the customer who incurs the costs of repairing such dimensioning

errors. If errors result from measurements carried out by Sport Transfer employees, Sport Transfer is charged with the possible costs of those.
