Product description Poles made of 100/120 mm oval aluminium profiles, reinforced, fastened to a special base containing a counterweight of 180 kg per pole. Bases equipped with wheels for easy transportation. Screw tension mechanism located inside the pole, movable with the use of an eccentric to facilitate setting and blocking the net tension in a given position by clamping the lock. Five net fixing points for tensioning on each pole. Infinitely adjustable net height. Fastening system enabling the set-up of volleyball training pitches without interference with the surface. The height of the poles complies with the regulations for sitting volleyball.
